

Key Seminar Series

Multisensory Math Lesson Planning

When: Friday, March 22nd, 2019

9:00am – 3:00pm

Cost: \$140 includes Lunch and Resource Packet of lesson planning resources and templates designed by Key School Multisensory Math teachers.

Workshop Presenters:

Matthew Buchanan & Catherine McKenzie

What is the Multisensory Math Lesson plan?

Designed to mirror the structure of an Orton-Gillingham lesson plan, The Key Learning Center **Multisensory Math Lesson Plan** utilizes Auditory, Kinesthetic, and Visual components to “prime the pump” for the instruction of new information. The introduction of new information follows the Concrete, Representational, Abstract (CRA) sequence to ensure students develop a strong conceptual understanding before learning efficient procedures for solving problems.

What will you gain from this workshop?

A direct impact on your lesson planning and implementation:

- An understanding of the components of a multisensory math lesson plan
- Ideas for grade level games, activities and exercises to help students practice skills in an efficient and effective manner
- Ideas for presenting new information at the Concrete, Representational, and Abstract levels of instruction to maximize understanding
- An opportunity to work collaboratively to plan and implement a demonstration lesson with feedback
